

TRILOGY INDUSTRIAL SALES

Trilogy Services:

- Flow Surveys – Ultrasonic meters calibrated for liquids and gases
- Level Surveys – Liquid level surveys backed by Questtec Solutions level experts
- Steam Surveys – Steam trap and surveys by Gestra, USA

Instrumentation

Gauging Systems Inc. (GSI):

Liquid Bulk Storage Tank Gauging • Overfill & Rupture Protection • Leak Detection • Vapor Monitoring • Tank Bottom or Roof Movement Indication

Fluenta:

Global leader in ultrasonic sensing technology for measurement of flare gas. Accurate at high & low temps and large pipe diameters. Fluenta's unique transducers do not intrude within the pipe, less exposed to corrosion, significantly reducing maintenance compared to other meters.

FLUENTA

Soldo:

Limit Switch Boxes • Limit Switches • Limit Switch Boxes with Integrated Solenoid Valves • Position Transmitters

Questtec Solutions (QTS):

Liquid and Magnetic Level Gages • Guided Wave Radar • Tubular Gage • Level Switches • Steam Gages

Midland-ACS:

SST Filter Regulators • Filters • Pressure Regulators • Pressure Switches • Needle Valves

Winters:

Pressure Gauges • Thermometers • Pressure Transmitters • Pressure Switches • Diaphragm Seals

Sandelius:

Thermowells, Thermocouples, RTD's, & Multipoints • Specialize in exotic alloys & excel in handling emergency jobs 24/7

Fairchild:

Filter Regulators • High Pressure & High Precision Regulators • Back Pressure Regulators • Vacuum Regulators

YTC:

Pneumatic Positioners • Electro Pneumatic Positioners • Smart Positioners

Valves & Actuation

Bray:

Butterfly Valves • Check Valves • Ball Valves • Knife Gate Valves • Cryogenic Valves • Control Valves • Actuators • Valve Accessories

Flow-Tek:

3 Piece Ball Valves • Flanged Ball Valves • Metal Seated • Severe Service • Trunnion • Multi Port • Cryogenic • Steam Isolation Valves • Actuators

Gestra:

Products & solutions for steam & condensate applications • Steam traps, severe service control valves, blowdown valves, isolation valves, non-return checks, strainers, & TDS boiler controls

AZ Valves:

High Performance sleeved and lined plug valves, lined ball valves, safety sample systems, lined sight flow indicators • HF Plug Valves, HP Plug Valves 1500psi • Double Block & Bleed Valves

Reman Fisher Sales:

Reman Fisher Control Valves • Reman Fisher Positioners

Amri:

PFA Lined Butterfly Valves • PFA Lined Ball Valves • Actuators

Fixed Equipment

Chase Filtration:

Hydraulic & Pneumatic Filters • Oxygen Filters • Coalescing Filters • Strainers & Valves • Portable Filters

Durco Filters:

Filter Presses • Pressure Leaf Filters • Pressure Nutsche Filters • Sludge Dryers • Tubular Backwash Filters

Machine Saver:

Predictive Maintenance, Industrial Accelerometers, & Vibration Solutions • Remote Predictive ML & AI Software, Vibration & Reliability Hardware, Dedicated Monitoring Svc

HotCaps:

Custom removable insulation Covers • Reusable High-Quality, Custom-made insulation jackets for equipment, vessels, & piping of all sizes

Pumps

Goulds:

Goulds Pumps

TEXCO Trim

Specialize in high quality, high tolerance machining, material traceability, overlays, aftermarket repair and retrofit of control and check valve internals and pump parts used in corrosive and erosive applications, including severe, high-pressure service.

Typical Applications We Specialize In:

- Valves and pumps used in especially severe corrosive and erosive services which require the use of tool steels, Tungsten carbide, Hastelloy alloys, Inconel alloys, Monel alloys, and chromium carbide, Colmonoy, Stellite and Wallex coatings.
- Check valves, control valves, and pumps used with slurries, high pressure, high temperature, and high flow corrosive and/or erosive fluids.
- Specialty fittings, packing glands, rod-out devices, retractable thermowells.
- Decades of experience repairing and rebuilding high pressure valves that are no longer supported by the manufacturer.
- Our machining/grinding is precise within .0005".
- Trusted partner with several valve OEM's .
- Complete traceability.
- We work daily with various custom overlays including stellite, colmonoy, wallex and chromium carbide.
- Custom engineering and AutoCAD drawings of your parts.

Some Of Valued Customers

High Pressure Custom Manufacturing:

- New components and upgrades available for unsupported valves
- Various valve internals used in both high pressure and erosive applications
- Packing Gland design expertise
- Catalyst pumps parts
- Cone Rings
- Lens Rings
- Autoclave

Sandelius

Since 1956 our name has meant reliability & quality you can trust. We design and manufacture all types of thermowells, thermocouples, RTDs, & multipoint assemblies. In addition to our core product lines, we also provide thermocouple wire, sensor accessories & fittings, bimetal & gas actuated thermometers & sample probes. High pressure thermocouples, high velocity thermowells & severe corrosion/erosion applications are some additional examples of the dynamic nature of our supply scope.

Some Of Valued Customers

We Specialize In:

- Custom Temperature Application Design
- Exotic Alloys & Coatings
- Emergency Rush Order Support
- Weekend Or After-Hour Deliveries
